

Job title: 2 x Electrical Engineer

**Salary:** 35-40k

**The company:**

Value Stream Machinery Ltd is a Belfast based company that continues to grow and excel with the services and machinery we provide. We work with some of the biggest household names, global brands and international food processors.

VSM offers a wide product portfolio from bespoke machinery solutions and manufacturing, to onsite training of engineers to assist with upskilling.

We have pride in the work we do, the products & services we supply, and the strong relationships we build with our customers.

We now wish to add to our team by recruit two additional Electrical Engineer to join the talented at VSM.

**The person:**

You are experienced and confident self-starter who is both a motivated individual and naturally acts as a team player by supporting your colleagues to meet goals. You take pride in your work and set high standards for yourself and others.

You are a logical thinker, a problem solver and a person who can identify improvements in processes & machinery.

You are calm when deadlines must be met and have the drive to hit them, yet the trust and maturity to ask for help when you are faced with challenges.

You can work as part of a team or on your own, take direction, and deliver on what you have agreed on.

You are an excellent communicator both written and verbally and are a good listener. You are organised and have excellent time management skills.

**The role:**

You could be working as part of the team on a project for a global company one week applying your electrical skills and fault-finding ability, and the next week split between helping assemble machinery at another company and attending a breakdown for a small independent factory.

The role will be as wide as it is varied involving the assistance to projects or planned and reactive maintenance across multiple locations.

We are looking for a talented & experienced multi-skilled individual, keen to enjoy the variance of work opportunities this role offers. General experience in food manufacturing/ production processing will benefit the electrical maintenance aspect to the role.

You will have the opportunity to learn, develop and grow as the company does through new situations, new techniques, and have support from VSM to help you succeed.

This is a day shift role is Monday to Friday, with the occasional weekend/night, in response to customer needs.
